

Harris Eyre, Ph.D., M.D.

**Professor for Brain Economy
Rice University and
The University of Texas Medical Branch
Houston, Texas**

Harris is a physician, neuroscientist, entrepreneur, and strategist. Harris is credited for pioneering the brain economy transition across sectors and industries. He is dedicated to fostering awareness, data, tools, investment, and leadership to drive the transition. He was the senior author of the first technical paper on the brain economy published in 2021; co-led the OECD Neuroscience-Inspired Policy Initiative; and supported the development of the Global Brain Capital Dashboard, published via The Brookings Institution. The work continues to proliferate and mature, and Eyre works across the spectrum of research, to strategy, movement building, and execution. In 2025, the World Economic Forum launched a Brain Economy Action Forum; the President of Cameroon endorsed the Yaoundé Declaration on the Brain Economy; the Center for Houston's Future launched the first city-level brain economy initiative; and multinational corporations and politicians from various cities, states, and nations are collaborating actively. Eyre is an alumnus of the Forbes 30 Under 30 and the Fulbright Scholar program. He has garnered recognition with the EB1A Green Card, an honor typically reserved for Nobel and Pulitzer Prize winners. He has authored over 200 papers and chapters in outlets such as Nature Medicine and The Brookings Institution, and he was the lead editor of the book *Convergence Brain Health* (Oxford Press).
